

PROFESSIONAL LINUX CONSULTING & TRAINING

CURSO JBOSS AVANZADO

OBJETIVO

Que el estudiante entienda y domine el proceso de configuración y puesta a punto de servidores Jboss y la implementación de clusters.

TEMARIO

- **Understanding clustering**
 - Understanding clustering
 - Setting up a simple cluster
 - Understanding JBoss clustering
 - Configuring JBoss Cache
 - Summary
 - References
- **Clustering JBoss AS services**
 - HTTP load balancing
 - HTTP session replication
 - Clustering session beans
 - Clustering entities
 - Clustering JNDI
 - Summary
 - References
- **Tuning the JBoss Application Server**
 - Defining performance
 - Performance tuning methodology
 - Tuning the hardware and network
 - Tuning the OS
 - Tuning the JVM
 - Tuning JBoss AS
 - Tuning your application
 - Summary
 - References
- **Going to production**
 - Selecting a platform
 - Collocating multiple application server instances
 - Removing unwanted services
 - Securing the server applications
 - Changing the default database
 - Starting the application server as a service
 - Configuring JSP compilation
 - Summary
 - Resources

Duración: 25 horas

Material: CD de Centos Linux

Documentación: JBoss In Action
